Brewing: Science and Practice (Woodhead Publishing Series in Food Science, Technology and Nutrition) D E Briggs, P A Brookes, R Stevens, C A Boulton

Brewing is one of the oldest and most complex technologies in food and beverage processing. Its success depends on blending a sound understanding of the science involved with an equally clear grasp of the practicalities of production. *Brewing: science and practice* provides a comprehensive and authoritative guide to both of these aspects of the subject.

After an initial overview of the brewing process, malts, adjuncts and enzymes are reviewed. A chapter is then devoted to water, effluents and wastes. There follows a group of chapters on the science and technology of mashing, including grist preparation. The next two chapters discuss hops, and are followed by chapters on wort boiling, clarification and aeration. Three chapters are devoted to the important topics of yeast biology, metabolism and growth. Fermentation, fermentation technologies and beer maturation are then reviewed, followed by a consideration of native African beers. After a discussion of brewhouses, the authors consider a number of safety and quality issues, including beer microbiology and the chemical and physical properties of beer, which contribute to qualities such as flavour. A final group of chapters cover packaging, storage, distribution and the retail handling of beer.

Based on the authors' unrivalled experience in the field, *Brewing: science and practice* is a standard work for the industry.

- A detailed account of all stages of the brewing process
- Safety and quality issues are discussed, including the chemical and physical properties of beer and beer microbiology
- A strong partnership of the science and the practicalities of production ensures this book is a primary reference

From reader reviews:

Dave Thomas:

Hey guys, do you desire to find a new book to see? Maybe the book with the headline Brewing: Science and Practice (Woodhead Publishing Series in Food Science, Technology and Nutrition) suitable to you? The actual book was written by renowned writer in this era. Typically the book untitled Brewing: Science and Practice (Woodhead Publishing Series in Food Science, Technology and Nutrition) is the main of several books which everyone read now. This particular book was inspired lots of people in the world. When you read this reserve you will enter the new age that you ever know ahead of. The author explained their concept in the simple way, therefore all of people can easily to know the core of this e-book. This book will give you a great deal of information about this world now. So that you can see the represented of the world with this book.

John Charlie:

Reading a publication can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new information. When you read a e-book you will get new information simply because book is one of several ways to share the information as well as their idea. Second, reading through a book will make you more imaginative. When you reading a book especially fictional book the author will bring one to imagine the story how the figures do it anything. Third, you are able to share your knowledge to other individuals. When you read this Brewing: Science and Practice (Woodhead Publishing Series in Food Science, Technology and Nutrition), you are able to tell your family, friends in addition to soon about yours reserve. Your knowledge can inspire others, make them reading a publication.

Jeffrey Garner:

The e-book with title Brewing: Science and Practice (Woodhead Publishing Series in Food Science, Technology and Nutrition) has a lot of information that you can study it. You can get a lot of advantage after read this book. This specific book exist new know-how the information that exist in this publication represented the condition of the world at this point. That is important to you to find out how the improvement of the world. This specific book will bring you inside new era of the globalization. You can read the e-book in your smart phone, so you can read that anywhere you want.

Keith Karam:
