For nearly a century, the central theological message of science seemed to be that there was no need for theology: science could stand alone to explain the universe. But today that message is changing.

In this volume, a gallery of respected scientists describes new developments in their fields and the relationship with theological views of the universe. Contributors include: Owen Gingerich, Russell Stannard, Paul Davies, Walter R. Hearn, Robert Russell, Arthur Peacocke, John Polkinghorne, John C. Eccles, Daniel H. Osmond, and David Wilcox.

Formerly published by Continuum, 1994.
