Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series) Joseph Ashley

No longer are heavy, sturdy, expensive mounts and tripods required to photograph deep space. With today's advances in technology, all that is required is an entry-DSLR and an entry level GoTo telescope. Here is all of the information needed to start photographing the night sky without buying expensive tracking mounts. By using multiple short exposures and combining them with mostly 'freeware' computer programs, the effect of image rotation can be minimized to a point where it is undetectable in normal astrophotography, even for a deep-sky object such as a galaxy or nebula. All the processes, techniques, and equipment needed to use inexpensive, lightweight altazimuth and equatorial mounts and very short exposures photography to image deep space objects are explained, step-by-step, in full detail, supported by clear, easy to understand graphics and photographs.

Currently available lightweight mounts and tripods are identified and examined from an economic versus capability perspective to help users determine what camera, telescope, and mount is the best fit for them. A similar analysis is presented for entry-level telescopes and mounts sold as bundled packages by the telescope manufacturers. This book lifts the veil of mystery from the creation of deep space photographs and makes astrophotography affordable and accessible to most amateur astronomers.

From reader reviews:

Gregorio Leslie:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite book and reading a guide. Beside you can solve your condition; you can add your knowledge by the reserve entitled Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series). Try to make the book Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series) as your friend. It means that it can to get your friend when you truly feel alone and beside that of course make you smarter than before. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know every thing by the book. So , let's make new experience and also knowledge with this book.

Cesar Ford:

The book Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series) can give more knowledge and also the precise product information about everything you want. So why must we leave the great thing like a book Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series)? Wide variety you have a different opinion about publication. But one aim in which book can give many data for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or facts that you take for that, it is possible to give for each other; you are able to share all of these. Book Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series) has simple shape but you know: it has great and large function for you. You can search the enormous world by start and read a guide. So it is very wonderful.

Teresa Dawkins:

Playing with family within a park, coming to see the coastal world or hanging out with buddies is thing that usually you will have done when you have spare time, subsequently why you don't try point that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series), it is possible to enjoy both. It is great combination right, you still need to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't buy it, oh come on its called reading friends.

Charles Morris:

A lot of people said that they feel bored stiff when they reading a reserve. They are directly felt it when they get a half parts of the book. You can choose often the book Astrophotography on the Go: Using Short Exposures with Light Mounts (The Patrick Moore Practical Astronomy Series) to make your reading is interesting. Your own skill of reading expertise is developing when you like reading. Try to choose simple

book to make you enjoy you just read it and mingle the sensation about book and examining especially. It is to be very first opinion for you to like to wide open a book and study it. Beside that the book *Astrophotography on the Go: Using Short Exposures with Light Mounts* (The Patrick Moore Practical Astronomy Series) can to be your brand-new friend when you're really feel alone and confuse in doing what must you're doing of this time.
