## **MODUS - Generation of Interfaces based on Models** Marina Machado

The user interface is essential for making a successful application. Nonetheless, studies have shown that a large percentage of the software development effort can be dedicated to the interface, which is not a sustainable solution. The software industry invested in the creation of development tools to overcome this issue. There was a particular interest in model-based methodologies, since they reuse artefacts of the application's development to automatically create the interface. However the automation on these methodologies tend to have a negative impact on the interface and its implementation. The MODUS (Model-based Developed User Systems) approach is a solution for this problem. Its main premise is to assume that, for specific domains, the interface can be built from a description of the application data. The business models allow the creation of solid skeletons for the interface, which can be iteratively refined by the designer. The prototype was tested and proved to increase the efficiency, accuracy and quality of the interface implementation. From the computer engineer to the user interface enthusiast, MODUS may be your solution for a faster and easier interface development.

### **From reader reviews:**

#### **Enrique Flora:**

The actual book MODUS - Generation of Interfaces based on Models has a lot details on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. Mcdougal makes some research just before write this book. This kind of book very easy to read you can obtain the point easily after looking over this book.

#### **Laquita Horton:**

Playing with family in a very park, coming to see the sea world or hanging out with friends is thing that usually you will have done when you have spare time, then why you don't try matter that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love MODUS - Generation of Interfaces based on Models, you may enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh come on its mind hangout guys. What? Still don't have it, oh come on its called reading friends.

#### **Catherine Mejia:**

In this particular era which is the greater individual or who has ability to do something more are more special than other. Do you want to become among it? It is just simple strategy to have that. What you have to do is just spending your time not much but quite enough to get a look at some books. One of several books in the top list in your reading list is MODUS - Generation of Interfaces based on Models. This book that is certainly qualified as The Hungry Mountains can get you closer in turning into precious person. By looking way up and review this reserve you can get many advantages.

#### **Gertrude Ponder:**

A lot of guide has printed but it differs from the others. You can get it by web on social media. You can choose the very best book for you, science, comic, novel, or whatever through searching from it. It is referred to as of book MODUS - Generation of Interfaces based on Models. You can add your knowledge by it. Without making the printed book, it may add your knowledge and make you happier to read. It is most critical that, you must aware about e-book. It can bring you from one place to other place.
