Laser Surface Modification and Adhesion (Adhesion and Adhesives: Fundamental and Applied Aspects) K. L. Mittal, Thomas Bahnners

The book provides a unique overview on laser techniques and applications for the purpose of improving adhesion by altering surface chemistry and topography/morphology of the substrate. It details laser surface modification techniques for a wide range of industrially relevant materials (plastics, metals, ceramics, composites) with the aim to improve and enhance their adhesion to other materials. The joining of different materials is of critical importance in the fabrication of many and varied products.
