Topological Methods in Algebraic Transformation Groups: Proceedings of a Conference at Rutgers University (Progress in Mathematics) Hanspeter Kraft

In recent years, there has been increasing interest and activity in the area of group actions on affine and projective algebraic varieties. Techniques from various branches of mathematics have been important for this study, especially those coming from the well-developed theory of smooth compact transformation groups. It was timely to have an interdisciplinary meeting on these topics. We organized the conference "Topological Methods in Algebraic Transformation Groups," which was held at Rutgers University, 4-8 April, 1988. Our aim was to facilitate an exchange of ideas and techniques among mathematicians studying compact smooth transformation groups, algebraic transformation groups and related issues in algebraic and analytic geometry. The meeting was well attended, and these Proceedings offer a larger audience the opportunity to benefit from the excellent survey and specialized talks presented. The main topics concerned various aspects of group actions, algebraic quotients, homogeneous spaces and their compactifications. The meeting was made possible by support from Rutgers University and the National Science Foundation. We express our deep appreciation for this support. We also thank Annette Neuen for her assistance with the technical preparation of these Proceedings.

From reader reviews:

Harold Graham:

Book is written, printed, or outlined for everything. You can know everything you want by a e-book. Book has a different type. As it is known to us that book is important factor to bring us around the world. Adjacent to that you can your reading ability was fluently. A publication Topological Methods in Algebraic Transformation Groups: Proceedings of a Conference at Rutgers University (Progress in Mathematics) will make you to end up being smarter. You can feel far more confidence if you can know about every little thing. But some of you think which open or reading some sort of book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you in search of best book or appropriate book with you?

Arlene Martin:

As people who live in the modest era should be update about what going on or data even knowledge to make these people keep up with the era that is always change and move forward. Some of you maybe will probably update themselves by studying books. It is a good choice for you personally but the problems coming to you actually is you don't know what type you should start with. This Topological Methods in Algebraic Transformation Groups: Proceedings of a Conference at Rutgers University (Progress in Mathematics) is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Archie Beard:

The book untitled Topological Methods in Algebraic Transformation Groups: Proceedings of a Conference at Rutgers University (Progress in Mathematics) contain a lot of information on it. The writer explains your ex idea with easy method. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read the idea. The book was compiled by famous author. The author provides you in the new period of literary works. It is possible to read this book because you can read more your smart phone, or model, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can open their official web-site along with order it. Have a nice study.

William Lee:

This Topological Methods in Algebraic Transformation Groups: Proceedings of a Conference at Rutgers University (Progress in Mathematics) is brand-new way for you who has fascination to look for some information because it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or you who still having small amount of digest in reading this Topological Methods in Algebraic Transformation Groups: Proceedings of a Conference at Rutgers University (Progress in Mathematics) can be the light food for you because the information inside this book is easy to get by simply anyone. These books develop itself in the form and that is reachable by anyone, yes I mean in the e-book

web form. People who think that in book form make them feel sleepy even dizzy this reserve is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss that! Just read this e-book variety for your better life in addition to knowledge.
