Geomorphology & Environmental Impact Ass

Geomorphology & Environmental Impact Ass

This volume focuses on the close relationship between geomorphology and environmental impact assessment, and provides a wide-ranging overview of this topic. It includes several case studies covering a variety of environmental impacts derived from human activities (quarrying, communication infrastructure etc.) on different geomorphologic components (landforms, soil, landscapes etc.) and environments (glacial, fluvial, coastal etc.) The case studies presented offer a methodological guide from the most traditional geomorphological approaches through to the use of spatial data analysis and GIS tools and techniques. Environmental Impact Assessment is a relatively new scientific branch in which a wide variety of specialists are increasingly becoming involved. This volume will be of interest to geomorphologists, biologists, geographers, architects and engineers.
