Paralysed Law: Confused Justice: Reversal of reversed unnatural selection Michael Coleade

Based upon accessible information, it is actual fact and absolute truth that District Judge Ayers of Bedford County Court could not spell the word, 'emphasise' and/or did not know the correct grammatical employment of the word, 'emphasis'. It is also true that the judge did not know the meaning of the word, 'will' and/or its correct grammatical employment, Functional semi-illiteracy is incompatible with the competent administration of the law. Competent administration of the law is an inviolable natural right. It will be naivety that borders upon dishonesty to suggest that the general decline in educational standards has left any part of the society untouched. The probability of a mistake is inversely proportional to rank and experience; it should be less likely in a proof-read and approved judgement. Unelected (illegal, parallel power), not merit based and a closet racist: a satanic network will not remove mediocrity and confusions from any society. Functional semi-illiterate judges are likelier to be racially biased. Some people ride on the back of tigers and pretend that they are tigers; dismounted, they instantaneously become nothing. "Dictators ride to and fro on tigers from which they dare not dismount. And the tigers are getting hungry." - Sir Winston Churchill (While England Slept, 1938) European trade in millions of stolen human beings decommissioned natural selection; agricultural labourers (Serfs) who would have been working with forks and spades on the estates of the upper classes are now something else. "The near absence of women and Black, Asian and minority ethnic judges in the senior judiciary, is no longer tolerable. It undermines the democratic legitimacy of our legal system." Sir Geoffrey Bindman QC; Karon Monaghan QC Diversity should be subservient to transparent colour blind meritocracy Diverse mediocrity is akin to raking muck. "Young people in the UK are falling far behind those in countries like Japan, Finland and the Netherlands in the basics, according to a major international study. It reveals that the literacy and numeracy skills of 16 to 24-year-olds are among the lowest in the developed world, and in general, are no better than those of their grandparents. Overall, in England, young people came 22nd for literacy and 21st for numeracy out of 24 countries." Organisation for Economic Cooperation and Development (OECD) "The report, by the OECD warns that the UK needs to take significant action to boost the basic skills of the nation's young people. The 460-page study is based on the first-ever survey of the literacy, numeracy and problem-solving at work skills of 16 to 65-year-olds in 24 countries, with almost 9,000 people taking part in England and Northern Ireland to make up the UK results. The findings showed that England and Northern Ireland have some of the highest proportions of adults scoring no higher than Level 1 in literacy and numeracy - the lowest level on the OECD's scale. This suggests that their skills in the basics are no better than that of a 10-year-old." OECD report Young adults have shepherds. Shepherds of morons are likelier to be morons too. "I do not approve of anything that tampers with natural ignorance. Ignorance is like a delicate exotic fruit; touch it and the bloom is gone. The whole theory of modern education is radically unsound. Fortunately in England, at any rate, education produces no effect whatsoever. If it did, it would prove a serious danger to the upper classes, and probably lead to acts of violence in Grosvenor Square." Oscar Wilde
