Light Field Sampling (Synthesis Lectures on Image, Video, and Multimedia Processin) Cha Zhang

Light field is one of the most representative image-based rendering techniques that generate novel virtual views from images instead of 3D models. The light field capture and rendering process can be considered as a procedure of sampling the light rays in the space and interpolating those in novel views. As a result, light field can be studied as a high-dimensional signal sampling problem, which has attracted a lot of research interest and become a convergence point between computer graphics and signal processing, and even computer vision. This lecture focuses on answering two questions regarding light field sampling, namely how many images are needed for a light field, and if such number is limited, where we should capture them. The book can be divided into three parts. First, we give a complete analysis on uniform sampling of IBR data. By introducing the surface plenoptic function, we are able to analyze the Fourier spectrum of non-Lambertian and occluded scenes. Given the spectrum, we also apply the generalized sampling theorem on the IBR data, which results in better rendering quality than rectangular sampling for complex scenes. Such uniform sampling analysis provides general guidelines on how the images in IBR should be taken. For instance, it shows that non-Lambertian and occluded scenes often require a higher sampling rate. Next, we describe a very general sampling framework named freeform sampling. Freeform sampling handles three kinds of problems: sample reduction, minimum sampling rate to meet an error requirement, and minimization of reconstruction error given a fixed number of samples. When the to-be-reconstructed function values are unknown, freeform sampling becomes active sampling. Algorithms of active sampling are developed for light field and show better results than the traditional uniform sampling approach. Third, we present a self-reconfigurable camera array that we developed, which features a very efficient algorithm for real-time rendering and the ability of automatically reconfiguring the cameras to improve the rendering quality. Both are based on active sampling. Our camera array is able to render dynamic scenes interactively at high quality. To the best of our knowledge, it is the first camera array that can reconfigure the camera positions automatically.

From reader reviews:

Debra Yarbrough:

Book will be written, printed, or outlined for everything. You can know everything you want by a e-book. Book has a different type. As it is known to us that book is important point to bring us around the world. Adjacent to that you can your reading expertise was fluently. A guide Light Field Sampling (Synthesis Lectures on Image, Video, and Multimedia Processin) will make you to end up being smarter. You can feel far more confidence if you can know about every thing. But some of you think that open or reading some sort of book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you in search of best book or ideal book with you?

Daniel Ellis:

This book untitled Light Field Sampling (Synthesis Lectures on Image, Video, and Multimedia Processin) to be one of several books in which best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit on it. You will easily to buy that book in the book retail outlet or you can order it by using online. The publisher on this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Touch screen phone. So there is no reason to you to past this reserve from your list.

Charles Anderson:

Playing with family in a park, coming to see the sea world or hanging out with friends is thing that usually you have done when you have spare time, in that case why you don't try matter that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Light Field Sampling (Synthesis Lectures on Image, Video, and Multimedia Processin), you could enjoy both. It is great combination right, you still would like to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't have it, oh come on its called reading friends.

Elizabeth Villalobos:

You can find this Light Field Sampling (Synthesis Lectures on Image, Video, and Multimedia Processin) by visit the bookstore or Mall. Just viewing or reviewing it could to be your solve challenge if you get difficulties for your knowledge. Kinds of this reserve are various. Not only by simply written or printed and also can you enjoy this book simply by e-book. In the modern era such as now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose correct ways for you.
