Accelerated DOM Scripting with Ajax, APIs, and Libraries (Expert's Voice) Aaron Gustafson, Jonathan Snook, Dan Webb, Stuart Langridge

If you're a web developer with previous JavaScript and DOM scripting experience, *Accelerated DOM Scripting with Ajax, APIs, and Libraries* is perfect for you to take your knowledge to the next level.

This book is about JavaScript and using the document object model—the conduit to the HTML document. This book is not about learning how to program JavaScript from scratch. It starts with the assumption that you have done some JavaScript development before and understand the JavaScript syntax. This book builds on that knowledge to give you a deeper understanding of DOM scripting and how to apply that to your projects. It uses this new understanding to describe what JavaScript libraries are and show you how they can be applied to your project. The book will also explain Ajax and how best to plan and apply it to your projects. It explains how to build simple animation objects for adding movement to elements on the page. There are straightforward examples that demonstrate the techniques used throughout the book.

JavaScript has seen a resurgence in popularity over the past few years, and with it has come an exploration of the power of the language as well as what it can do within the browser. This book will explain techniques new and old—such as closures, encapsulation, and inheritance—that many are using and how you can best apply them to your own projects.

By reading this book, you should have a greater understanding of how JavaScript works and be able to use advanced concepts such as closures and event delegation to build more flexible applications for the Web. You'll walk away with a greater appreciation for JavaScript libraries and how they can simplify and speed up your development. You'll also be able to implement Ajax effectively into your site, create special effects, use JavaScript libraries, and know how best to apply these libraries to your projects.

What you'll learn

- Where CSS, HTML, and the DOM fit into modern scripting, and how to use them together effectively
- Object-oriented programming techniques for more efficient JavaScript coding
- How to use JavaScript libraries such as Prototype in your work
- How to build effective form validation into your applications using Ajax
- How to create mashups using APIs
- How to build dynamic user interfaces

Who this book is for

This book is for beginner to intermediate developers, and already have knowledge of HTML, CSS, and JavaScript.

From reader reviews:

Patrice Gasaway:

What do you consider book? It is just for students as they are still students or that for all people in the world, what best subject for that? Only you can be answered for that query above. Every person has various personality and hobby for every single other. Don't to be forced someone or something that they don't wish do that. You must know how great and also important the book Accelerated DOM Scripting with Ajax, APIs, and Libraries (Expert's Voice). All type of book is it possible to see on many sources. You can look for the internet methods or other social media.

Beverly Ingram:

As people who live in the particular modest era should be revise about what going on or facts even knowledge to make these individuals keep up with the era that is always change and move forward. Some of you maybe will probably update themselves by reading books. It is a good choice for you personally but the problems coming to anyone is you don't know what kind you should start with. This Accelerated DOM Scripting with Ajax, APIs, and Libraries (Expert's Voice) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Patricia French:

Now a day people who Living in the era just where everything reachable by match the internet and the resources within it can be true or not call for people to be aware of each data they get. How a lot more to be smart in obtaining any information nowadays? Of course the solution is reading a book. Looking at a book can help people out of this uncertainty Information especially this Accelerated DOM Scripting with Ajax, APIs, and Libraries (Expert's Voice) book because this book offers you rich information and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you know.

Jodie Kahl:

Is it a person who having spare time and then spend it whole day by means of watching television programs or just resting on the bed? Do you need something totally new? This Accelerated DOM Scripting with Ajax, APIs, and Libraries (Expert's Voice) can be the solution, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?
