Concurrent and Real-Time Programming in Ada

Alan Burns, Andy Wellings

Concurrent and Real-Time Programming in Ada Alan Burns, Andy Wellings

Ada is the only ISO-standard, object-oriented, concurrent, real-time programming language. It is intended for use in large, long-lived applications where reliability and efficiency are essential, particularly real-time and embedded systems. In this book, Alan Burns and Andy Wellings give a thorough, self-contained account of how the Ada tasking model can be used to construct a wide range of concurrent and real-time systems. This is the only book that focuses on an in-depth discussion of the Ada tasking model. Following on from the authors' earlier title *Concurrency in Ada*, this book brings the discussion up to date to include the new Ada 2005 language and the recent advances in real-time programming techniques. It will be of value to software professionals and advanced students of programming alike: indeed every Ada programmer will find it essential reading and a primary reference work that will sit alongside the language reference manual.

From reader reviews:

Michelle Beltran:

As people who live in the particular modest era should be update about what going on or information even knowledge to make all of them keep up with the era that is certainly always change and progress. Some of you maybe can update themselves by studying books. It is a good choice in your case but the problems coming to an individual is you don't know which you should start with. This Concurrent and Real-Time Programming in Ada is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and wish in this era.

Charles Wilkerson:

The guide with title Concurrent and Real-Time Programming in Ada possesses a lot of information that you can study it. You can get a lot of advantage after read this book. This particular book exist new knowledge the information that exist in this e-book represented the condition of the world currently. That is important to yo7u to know how the improvement of the world. This specific book will bring you in new era of the globalization. You can read the e-book with your smart phone, so you can read it anywhere you want.

Terry Holmes:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your morning to upgrading your mind skill or thinking skill even analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short period of time to read it because pretty much everything time you only find guide that need more time to be read. Concurrent and Real-Time Programming in Ada can be your answer mainly because it can be read by you who have those short extra time problems.

Nettie Powers:

Beside this particular Concurrent and Real-Time Programming in Ada in your phone, it could possibly give you a way to get nearer to the new knowledge or facts. The information and the knowledge you can got here is fresh from the oven so don't become worry if you feel like an outdated people live in narrow small town. It is good thing to have Concurrent and Real-Time Programming in Ada because this book offers to you readable information. Do you at times have book but you would not get what it's all about. Oh come on, that will not happen if you have this within your hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss it? Find this book and read it from right now!
