Handbook of Mathematical Tables and Formulas Burington

From the "To the Student who uses this Handbook": "As a student of mathematics you are studying the subject, either because you have a liking for it or, because it is a required subject in your professional training - happily, if for both of these reasons. The subject is one of the fundamental natural sciences and perhaps the most fundamental of all. While a mathematician may not necessarily need to know of engineering, physics, chemistry, or other natural sciences, yet to every engineer, physicist, chemist, or other scientist mathematics is a necessity...The contents of this 'Handbook' were carefully selected by one who has had many years of experience in teaching the subject to prospective scientists and engineers...Where could you possibly find a more handy and reliable source for the information which it presents and which you need?"
