A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) Andrew Jamison, Steen Hyldgaard Christensen, Lars Botin

This book presents a cultural perspective on scientific and technological development. As opposed to the "story-lines" of economic innovation and social construction that tend to dominate both the popular and scholarly literature on science, technology and society (or STS), the authors offer an alternative approach, devoting special attention to the role played by social and cultural movements in the making of science and technology. They show how social and cultural movements, from the Renaissance of the late 15th century to the environmental and global justice movements of our time, have provided contexts, or sites, for mixing scientific knowledge and technical skills from different fields and social domains into new combinations, thus fostering what the authors term a "hybrid imagination." Such a hybrid imagination is especially important today, as a way to counter the competitive and commercial "hubris" that is so much taken for granted in contemporary science and engineering discourses and practices with a sense of cooperation and social responsibility. The book portrays the history of science and technology as an underlying tension between hubris -- literally the ambition to "play god" on the part of many a scientist and engineer and neglect the consequences - and a hybrid imagination, connecting scientific "facts" and technological "artifacts" with cultural understanding. The book concludes with chapters on the recent transformations in the modes of scientific and technological production since the Second World War and the contending approaches to "greening" science and technology in relation to the global quest for sustainable development. The book is based on a series of lectures that were given by Andrew Jamison at the Technical University of Denmark in 2010 and draws on the authors' many years of experience in teaching non-technical, or contextual knowledge, to science and engineering students. The book has been written as part of the Program of Research on Opportunities and Challenges in Engineering Education in Denmark (PROCEED) supported by the Danish Strategic Research Council from 2010 to 2013.

Table of Contents: Introduction / Perceptions of Science and Technology / Where Did Science and Technology Come From? / Science, Technology and Industrialization / Science, Technology and Modernization / Science, Technology and Globalization / The Greening of Science and Technology

From reader reviews:

Monte Lawson:

Do you have something that you prefer such as book? The reserve lovers usually prefer to pick book like comic, quick story and the biggest one is novel. Now, why not attempting A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) that give your enjoyment preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the way for people to know world much better then how they react in the direction of the world. It can't be mentioned constantly that reading addiction only for the geeky man but for all of you who wants to become success person. So , for all you who want to start examining as your good habit, it is possible to pick A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) become your own starter.

Robin Blakely:

The book untitled A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) contain a lot of information on that. The writer explains her idea with easy means. The language is very clear and understandable all the people, so do certainly not worry, you can easy to read it. The book was compiled by famous author. The author will take you in the new era of literary works. You can easily read this book because you can continue reading your smart phone, or program, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can start their official web-site along with order it. Have a nice study.

Eric Bittinger:

As we know that book is important thing to add our understanding for everything. By a guide we can know everything we want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This book A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) was filled with regards to science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading any book. If you know how big selling point of a book, you can experience enjoy to read a publication. In the modern era like now, many ways to get book that you wanted.

Regina Schubert:

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book had been rare? Why so many concern for the book? But any people feel that they enjoy for reading. Some people likes studying, not only science book but also novel and A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) or perhaps others sources were given understanding for you. After you know how the great a book, you feel would like to read more and

more. Science book was created for teacher or even students especially. Those books are helping them to put their knowledge. In additional case, beside science book, any other book likes A Hybrid Imagination: Science and Technology in Cultural Perspective (Synthesis Lectures on Engineers, Technology, and Society) to make your spare time a lot more colorful. Many types of book like here.
