From smartphones to social media, from streaming videos to fitness bands, our devices bring us information and entertainment all day long, forming an intimate part of our lives. Their ubiquity represents a major shift in human experience, and although we often hold our devices dear, we do not always fully appreciate how their nearly constant presence can influence our lives for better and for worse.

In this revised and expanded edition of *How Fantasy Becomes Reality*, social psychologist Karen E. Dill-Shackelford explains what the latest science tells us about how our devices influence our thoughts, feelings, and behaviors. In engaging, conversational prose, she discusses both the benefits and the risks that come with our current level of media saturation. The wide-ranging conversation explores *Avatar*, *Mad Men*, *Grand Theft Auto*, and Comic Con to address critical issues such as media violence, portrayals of social groups, political coverage, and fandom. Her conclusions will empower readers to make our favorite sources of entertainment and information work for us and not against us.
