Arduino Robotics (Technology in Action)

John-David Warren, Josh Adams, Harald Molle

Arduino Robotics (Technology in Action) John-David Warren, Josh Adams, Harald Molle

This book will show you how to use your Arduino to control a variety of different robots, while providing step-by-step instructions on the entire robot building process. You'll learn Arduino basics as well as the characteristics of different types of motors used in robotics. You also discover controller methods and failsafe methods, and learn how to apply them to your project. The book starts with basic robots and moves into more complex projects, including a GPS-enabled robot, a robotic lawn mower, a fighting bot, and even a DIY Segway-clone.

- Introduction to the Arduino and other components needed for robotics
- Learn how to build motor controllers
- Build bots from simple line-following and bump-sensor bots to more complex robots that can mow your lawn, do battle, or even take you for a ride

Please note: the print version of this title is black & white; the eBook is full color.

From reader reviews:

Oliver Crites:

Book is definitely written, printed, or highlighted for everything. You can learn everything you want by a book. Book has a different type. As you may know that book is important point to bring us around the world. Next to that you can your reading ability was fluently. A reserve Arduino Robotics (Technology in Action) will make you to become smarter. You can feel a lot more confidence if you can know about anything. But some of you think that open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you trying to find best book or suited book with you?

Robert Rooks:

Reading can called imagination hangout, why? Because if you are reading a book mainly book entitled Arduino Robotics (Technology in Action) your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unknown for but surely will become your mind friends. Imaging just about every word written in a guide then become one web form conclusion and explanation this maybe you never get just before. The Arduino Robotics (Technology in Action) giving you one more experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us present to you the relaxing pattern this is your body and mind will likely be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary paying spare time activity?

Victoria Owen:

Your reading sixth sense will not betray an individual, why because this Arduino Robotics (Technology in Action) reserve written by well-known writer we are excited for well how to make book that can be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and creating skill only for eliminate your own hunger then you still question Arduino Robotics (Technology in Action) as good book not just by the cover but also by content. This is one publication that can break don't evaluate book by its include, so do you still needing one more sixth sense to pick this specific!? Oh come on your reading sixth sense already told you so why you have to listening to an additional sixth sense.

Ernie Fleishman:

Reading a book for being new life style in this 12 months; every people loves to read a book. When you go through a book you can get a wide range of benefit. When you read books, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this kind of us novel, comics, in addition to soon. The Arduino Robotics (Technology in Action) provide you with new experience in looking at a book.
